PROFILE

Software engineer with 9+ years developing web applications, specializing in React/TypeScript, performance, and real-time systems. Independently designed, developed, and delivered complex frontend and full-stack features for a large-scale enterprise application.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, Material UI, HTML/CSS, Figma, responsive and accessibility-aware UI
Backend & data: Node.js, REST APIs, Socket.IO, MongoDB, MySQL, PHP/Laravel
Performance & tooling: Chrome DevTools Performance Profiler, Lighthouse, Webpack, Webpack Bundle Analyzer, code splitting, Service Workers
Architecture & principles: Clean Architecture, hexagonal and layered architectures, SOLID (SRP, OCP, LSP, ISP, DIP), modular design, event-driven systems

EXPERIENCE

Software Engineer
Jan 2023 – Oct 2026

Sun West Mortgage Company, Inc. | Remote

- Significantly reduced application CPU processing time by profiling JavaScript, layout, React rendering and CSS animation bottlenecks across three user scenarios with CPU/network throttling.
- Collaborated on the Webpack-to-Vite migration, analyzing FCP, LCP, and TTI metrics and recommending optimizations that substantially improved application startup performance.
- Architected an extensible real-time chat-view system, consolidating duplicated legacy logic into reusable components and modular data-loading abstractions to improve maintainability and feature extensibility.
- Architected an extensible chat-loading abstraction with reusable state-management and synchronization mechanisms, coordinating pagination, individual chat requests, and real-time events to prevent data inconsistencies and improve maintainability.
- Resolved critical React rendering bottlenecks that caused significant performance degradation in larger conversations; also resolved expensive footer style recalculations.
- Designed and delivered a full-stack connections feature enabling users to view referred users, start chats, and send direct or broadcast messages, using modular backend services, reusable business logic, and cross-service API integrations.
- Designed a notification center in Figma and implemented it in React with interactive previews and clearing, BroadcastChannel cross-tab sync, and supporting backend notification events and watchers.
- Reworked Service Worker lifecycle handling to prevent stale production assets across deployments and tabs; created a reusable banner queue that guides users through blocked updates.
- Mapped microservice dependencies and event flows to support architectural design and diagnosis of cross-service bugs.
- Investigated and resolved complex cross-service real-time synchronization issues, improving event delivery reliability and consistency of user-facing messaging data.
- Independently introduced shared TypeScript models for core business entities and interfaces for common services, improving type safety in a mature legacy application.
- Developed reusable, configurable React/MUI animation components and transition utilities, standardizing animations and accelerating UI development across independently owned and team-developed features.
- Mentored newly onboarded engineers, reviewed React PRs, authored component performance guidelines, and recommended technical approaches implemented by teammates.

Software Engineer (Part-Time)
Feb 2019 – Dec 2022

University of Illinois at Chicago | Hybrid

- Built faculty- and student-facing applications, including PHDEval with multistep forms and admin workflows, using JavaScript, Bootstrap, Laravel and MySQL.
- Developed backend APIs, data exports, authentication features and a lightweight reusable UI framework.

Freelance Web Developer
2017 – 2019

Independent client projects, Ukraine | Project-based engagements

- Designed and built client websites end to end, including a hotel site, using JavaScript, Bootstrap, PHP/CodeIgniter, MySQL and Firebase Cloud Functions.

EDUCATION & LANGUAGES

University of Illinois at Chicago | Bachelor's Degree, Computer Science | Dec 2022 | GPA 3.2
English (fluent) | Ukrainian (native/bilingual) | Russian (native/bilingual)
